

Xentity is the only tech integrator firm that puts the data program first.

Data Program Services

STRATEGY / BLUEPRINT

- Chief Data Office Advisors
- Data-to-AI Investment Analysis
- Program Architecture
- Data Industry SMEs

PRODUCTION / OPERATIONS

- Data Production
- Data Operations
- System Operations
- Authoritative Dataset Creation

Data Solution Services

DESIGN / LAB

- Solution Architecture
- Solution Design
- Solution Analysis
- Transition Planning

DEVELOPMENT

- Data Applications Development
- Data Products Development
- Data Platform Development
- [JumpStart](#) Proof of Concept Labs

150+ Clients

125+ Active Staff

350+ Projects

Xentivity is a leader in Enterprise and National Transformation Data Programs:

Geospatial	Open	Big & IoT	Voice & Language
<ul style="list-style-type: none"> - Largest National Geospatial Program Transformation - Largest National Geospatial and Data Services for Land Management in the U.S. - Largest U.S. Geospatial Platform Services 	<ul style="list-style-type: none"> - Supported earliest Chief Data Offices in the US (including White House to State DOTs). - Largest U.S. Open Data Program Services - National Award-Winning State Open Data 	<ul style="list-style-type: none"> - Largest transportation and infrastructure data analytical services - Large Video and Real-Time Infrastructure Data Platforms - Data Platform Cloud Migrations from Data Centers 	<ul style="list-style-type: none"> - NoCode Voice Integration iPaaS platforms with ChatBots since 2018 - Multiple AI contracts creating eDiscovery, transcription, Geo LLM/RAG and Real-Time Integration

Contract/Vehicles

- GS Schedule Contract # GS-00F-0038Y (541611, 54151S, 541370GEO, 541370GIS)
- Small Business Simplified Acquisitions – up to \$250,000, 1 year
- Multiple BPAs/IDIQs (DOI, USGS, USFS, BTS, FHWA, USACE, more)

Data Subject Matter Expertise

- Land & Environment
- Forest & Timber
- Energy & Utilities
- Wildland Fire
- Physical Assets
- Earth Science
- Health
- Data Management

We design, develop, and integrate data ready solutions for knowledge use

- **Descriptive:** A range of data aggregation solutions explains “What happened?”
- **Diagnostic and Directive:** Information and Knowledge solutions joins data to answer “Why did it happen?” and “What is or will be happening?”
- **Prescriptive:** Wisdom AI solutions provide recommended options “What should we do?”
